

Minerva Web Development

Capabilities Statement

Minerva Web Development is a Native American-owned business specializing in providing innovative digital solutions tailored to the needs of government entities. With over a decade of experience, we are committed to enhancing accessibility, efficiency, and engagement through secure and dynamic web development services.

Core Competencies

- **Custom Web Development:** Creating responsive, accessible, and visually appealing websites tailored to government standards.
- **Web Application Development:** Building secure and efficient applications to enhance operations and user experiences.
- **Maintenance & Support:** Providing ongoing technical support, ensuring systems are secure, compliant, and optimized.
- **Accessibility Compliance:** Developing platforms that meet ADA, Section 508, and WCAG standards, ensuring inclusivity for all users.

Differentiators

Minerva Web Development brings a unique blend of technical expertise, leadership, and innovation to government digital solutions. Led by a Dynamic Lead Engineer with 10+ years in software development and infrastructure optimization, we specialize in building scalable, secure, and high-performing web applications

Experience

Bitly – Aug 2024:Present

Managed large-scale digital operation that included, optimizing infrastructure, and driving high-impact innovations. We were able to successfully manage a SaaS application with millions of active users, ensuring fast, reliable content delivery while spearheading initiatives to enhance system performance, scalability, and administrative efficiency. Our company was proactive at problem-solving and contingency planning, minimizing downtime and ensuring seamless operations for the client.

Minerva Web Development - July 2018:Present

Clientele web development from ground up and improving existing systems making things better, more efficient, and future proof. Rebuilt and improved an existing platform that garnered ~10 million weekly visitors with 0 down time. Implemented a fully scalable and redundant system to ensure 100% uptime.
